50X1-HUM

Attached is a map of the city of Kaposvar on which are pinpointed the following military installations:

1) Office of a military justice headquarters (Kaposkari Birosag). An old building, several storeys high, painted red, it is located on Zalka Mate, around 500 meters from the railway station.

2) An army depot, located in a park on the western outskirts of the city, probably a munitions dump, since dirt has been piled up around it for protection (a sort of target butt, characteristic of munitions depots) and small one-storey buildings built around it.

3. An infantry barracks, this is a modern installation, consisting of a number of light-grey buildings located at the 49-kilometer mark on the new highway #67. The entrance to the barracks is on the highway.

4. An Army barracks. Around twenty ambulances and numerous other vehicles of other types have been observed there. Soldiers seen at the barracks wear various collar patches (red, green). It is believed that a division-level motor pool (? - auto reparto divisionale) is located here. This barracks (attached to #3 above) is also modern and painted light grey. The entrance is on the highway.

5. A depot located on the west side of highway #67 at the 47-kilometer mark, about 500 meters from the road. A small depot, it consists of two or three small buildings of the same type and color as the buildings which make up the barracks, with radio antennas, fenced in barbed wire and guarded. Although concrete elements are lacking, it is believed that this is a general depot (for storing materiel, fuel, etc.).
